Hope to see everyone at the party.

Construction Note: If you have been following my Hauntsville articles you should recognize the bandstand construction. I used the Heavy Brown Wrapped Wire described in the Special Trees article. I made two trees, one for each side of the bandstand. I used long roots the hold the stage in place and tangled the tree branches to create the canopy. I ran some Leaf Garland with yellow leaves through the tree branches to provide some color for the stage. Next to the stage in the image below you can see a basic bare branch tree with a string of Halloween Lantern lights attached to the branches. The technique is described in the Special Trees article.
